Github Starred Fetch: how it is put together

sketched from the fil

Github Starred Fetch: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GR

Product map: what Github Starred Fetch is for

WHAT IT IS

A small project in Python, Markdown. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: fetch.py, README.md, LICENSE.

WHAT COMES OUT

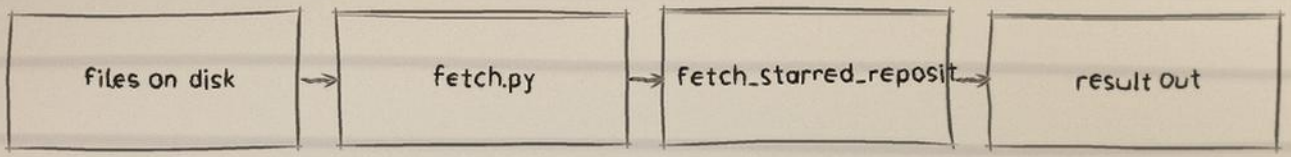

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Github Starred Fetch: data flow, in one direction

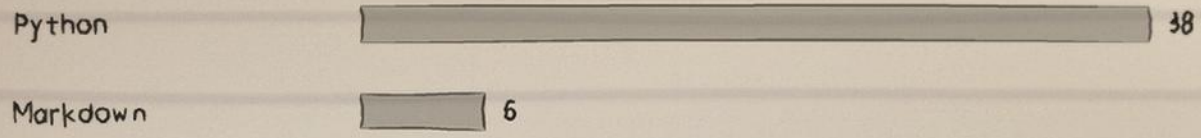

One direction. Anything the code does not do is not drawn.

second sheet, GK

Github Starred Fetch in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.
3 commits, first 2024-08-26, last 2024-08-25, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Github Starred Fetch: schematic of the apparatus

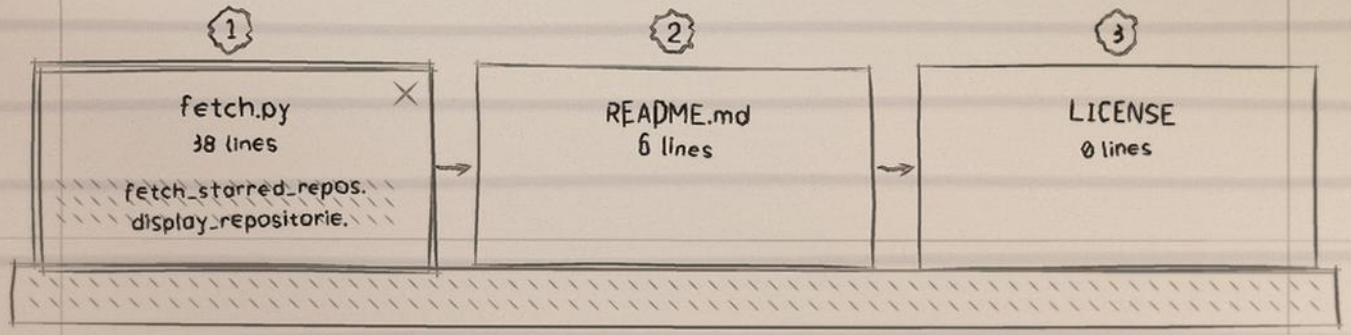

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. fetch.py
2. README.md
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 44 lines counted

turns of the crank so far: 3 commits, 2024-08-26 to 2024-08-26

measured and sketched, GK
